DETAILED ACTION

Claim Status / Elected Composition

- I. Election was made by Applicant on 2/26/03 to an invention comprising polyethoxylated alkylphenol, anabasine plus aloperine. This election resulted in a number of the claims being withdrawn from consideration. In office action dated 11/04/04, Examiner inadvertently omitted the election requirement. At this time Examiner is issuing this office action as a non-final with the reconsideration of the election requirement. Based on the reconsideration of the election requirement a number of claims are withdrawn from consideration.
- II. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 1,4-6,25-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bottger et al (US Dept. Agr., Bur. Entomol. Plant Quarantine, 1946, E-710, p. 5), Li (CN 1194782; 10/07/98), Qin (CN 1032731; 05/10/89) and Meira et al (Br 8903227; 1/2/91). Bottger teaches an insecticidal composition comprising anabasine. Li teaches an insecticidal composition comprising stemonine. Qin teaches an insecticidal composition comprising Toosendanin and pine oil. Meira et al teaches an insecticidal composition comprising ethoxylated alkylphenol. The references do not teach a single composition comprising anabasine, stemonine, toosendanin

plus polyethoxylated alkylphenol. However, it would have been obvious to one having ordinary skill in the art to combine the references resulting in a single composition comprising anabasine, stemonine, toosendanin plus polyethoxylated alkylphenol. One would have been motivated to do this since all individual references teach insecticidal compositions – it is obvious to combine references teaching the utility. Applicant claims a synergistic composition. However, provides no data in the specification to support a synergistic composition.

Telephonic Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton N. Pryor whose telephone number is 571-272-0621. The examiner can normally be reached on 8:00 a.m. - 4:30 p.m..
